

Professional webcasting

Create professional web presentations with live video synchronized powerpoint slides and immediate audience interactions.

Webocaster is the tool for professionals who expect quality and perfection. Stay on top, get the best tool on the market. Get webocaster.

Total control at your fingertips

Stunning presentations

Choose from a broad range of crisp presentation layouts. Customize resizable layouts with your company look and feel.

Interact with your audience!

Let your web audience vote or answer questions. Broadcast back results immediately. Viewers can ask questions by email or through a chat window. Broadcast messages and pictures on the fly and open a webpage for the viewer. Audience interactions can be shown separately.

Content security

Make sure that your content reaches only the intended audience. Login and password features are built into the presentations.

Complete broadcast control

Control slide changes and audience interactions during the show. Remote control restart/abort the viewer. Push interactions on the fly or prepare them in advance.

Rock stable live performance

At live events people trip over cables and fuses blow... Webocaster is architected with this in mind. Recover quickly from pulled cables, errors, mistakes, power failure and machine crashes.

On demand

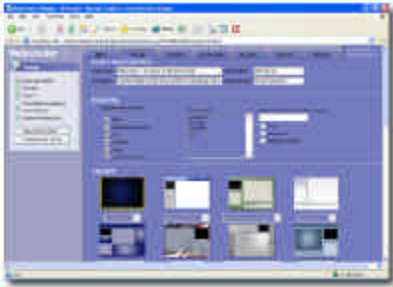

Archive your live events to be viewed on demand. Complete with layout, video and synchronized slides. Export entire shows to CD discs.

Features:

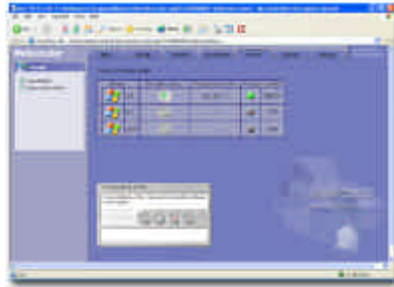

- Setup and control from any PC using Internet Explorer.
- Easy to use Live Control and On-Demand editor.
